Nature-Based Solutions at  
Palladium

Palladium works with governments, companies and civil society to build more effective and accountable institutions, to inform national policies, to build socially inclusive markets and to protect, restore and generate value from natural resources and our environment.

Palladium designs and delivers positive impact solutions, that combine enduring social, environmental and financial outcomes

Palladium's Nature-Based Solutions team offers a proven approach to leveraging public and private capital to restore nature at scale.

We design investment vehicles to scale Nature-Based Solutions (NBS) that protect, sustainably manage, and restore nature to help address societal challenges.

We incubate NBS by supporting project developers to capture and market the natural capital they create through restoration work.

We help companies to offset their environmental liabilities through carbon, biodiversity, water quality or other ecosystem service credits.

Our vision is a world where nature and ecosystems are transformed into a healthy state, and markets are reoriented to value natural capital and incentivise its long term restoration.

Palladium has the right expertise to create, finance and scale up Nature-Based Solutions

We have proven experience in Nature-Based Solutions and in finance.

We bring a strong track record in the environmental and financial skills needed to create commercially viable nature based solutions.

#### Project Development

Palladium's NBS team specialises in business incubator design, project development and financing for the protection and restoration of nature

#### Impact Capital Advisory

Palladium Impact Capital is a market leading impact investment bank providing services including fund design and structuring

#### Matchmaking & Brokering

### OUR IMPACT

**55**

Years of experience working with businesses, governments, and NGOs across sectors

**100**

Improved regenerative business models

**71M**

Tonnes of CO2 reduced and avoided GHG emissions by 2023

**\$585M**

Equity and debt capital mobilized over the past ten years

**90**

Countries with Palladium teams working on the ground

**1M+**

Hectares of land under improved management via our interventions

**\$250M+**

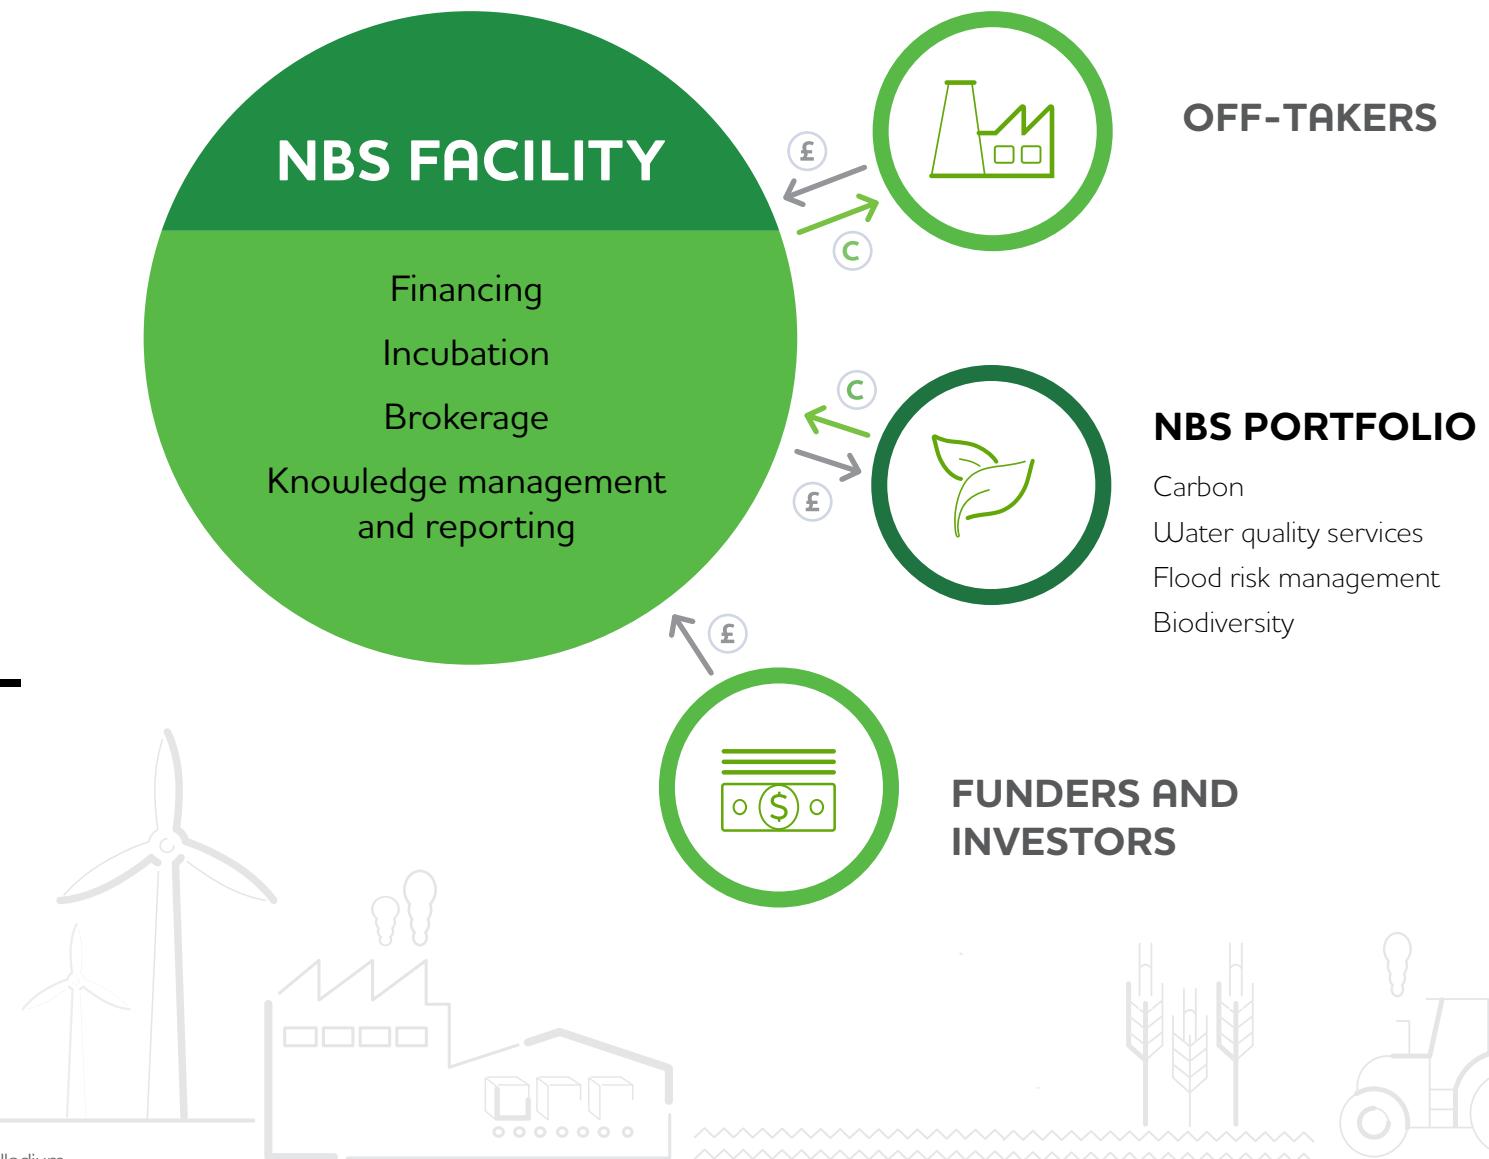

Private investment mobilised into regenerative business models

The NBS facility is a one-stop shop that offers businesses, organisations, funders and investors the opportunity to:

- Invest in nature restoration and support the fight against climate change
- Meet net zero goals and other environmental, social and governance (ESG) commitments through the purchase of carbon, biodiversity, water services and other credits
- Access a portfolio of global NBS projects to find the best fit with your internal sustainability agenda and strategy
- Generate inspirational content to engage your staff, clients, and shareholders

The NBS Facility will catalyse public and private finance into landscape restoration, and work with businesses and organisations looking to offset their environmental footprint

Harnessing the opportunity to restore our natural environment in the UK, and indeed globally, requires a new approach and a combination of partners across different disciplines.

We want to hear from others who share our passion for protecting and restoring the UK's natural capital at scale.
