OUR PURPOSE

To catalyse an enriched future for all.

Palladium is in the business of making the world a better place, and we believe that collaborative models and systemic approaches are the way to achieve progress and success.

It's no longer enough to pursue social progress or commercial growth. In fact, we don't believe you can have one without the other. When you have both, that's what we call "Positive Impact".

For the past 55 years, we've helped our clients to see the world as interconnected – by formulating strategies, building partnerships, mobilising capital, and implementing programs that have a lasting social and financial impact.

The future demands new thinking, new approaches, and new solutions. With a global network operating in over 90 countries, we believe in a better world, and we work to make it possible.

OUR CLIENTS

Governments, corporations, and investors need to work together with communities and civil society, and we have half a century of experience working with each.

Businesses

Palladium helps leaders increase their bottom line through sustainable and profitable business strategies. Businesses operate in a complex ecosystem, and the only way to ensure long-term success is by linking social, environmental and financial results. We work at the intersection of commercial growth and social progress, because we know that working toward the greater good creates the greatest opportunity.

Donors/Bilaterals

Palladium is a leading implementer of international development programs. Working in over 90 countries and across a broad range of sectors, we offer donor agencies a balance of global scale with local knowledge and in-house technical expertise. Aid is a critical component of our shared pursuit of the Sustainable Development Goals, and we bring our knowledge of the private sector to bear in designing solutions that use aid to spark lasting social and economic development.

Governments

Palladium works with governments around the world to make transformational change possible across regions and countries. We combine the rigour of private sector strategy execution with our deep understanding of development fundamentals to create more efficient governments and lasting social progress.

OUR RESPONSE TO INFRASTRUCTURE

Infrastructure is the foundation of an inclusive society, helping to reduce poverty and improve lives. Investment in infrastructure is linked directly to economic growth and citizens' quality of life, and can mean the difference between resilience and catastrophe when faced with a crisis.

Palladium Infrastructure advises, facilitates, and delivers capital solutions to meet infrastructure needs at the community, national, and regional level.

Our business model ensures that we can deploy resources immediately, whilst our experience allows us to manage rapidly changing situations, implement innovative modular solutions, and provide long lasting capital infrastructure, designed and built to fit local conditions and contexts.

Whether taking on a long-term program or responding to a sudden-onset disaster or emergency, we provide a holistic approach to meet the needs of our clients and the communities they serve.

Our clients are facing significant challenges, including:

- Difficult Geopolitical Climate
- Increased Demand for Sustainable Investment
- Social and Environmental Safeguards
- Impacts from Climate Change
- Funding Constraints
- COVID-19 and Future Pandemics

Our industry experts understand these important issues and are focused on collaboration to maximise the benefits, both economic and social, from any investment.

“Our COVID-19 response requires investment to support national resilience and improve economic recovery.”

Brad Richardson
Head of Palladium Infrastructure

GLOBAL STRENGTH.

REGIONAL KNOWLEDGE.

INDUSTRY SPECIALISATION.

Palladium Infrastructure combines leading development expertise with a sound understanding of how to advise on and deliver infrastructure projects locally.

We aspire to create positive impact – economically, socially, and environmentally – and employ and develop the best people in their fields to achieve this.

We value our peoples' expertise, just as we value that of our clients. We believe in the power of collaboration through high-performing teams.

We are innovative and operate with initiative and integrity.

Through our global strength, combined with our local knowledge and specific industry understanding, we have the diversity of skills to advise and deliver on projects and programs holistically.

OUR SECTORS

Aviation

Our knowledge and experience working on major international airports, airfields, and ancillary aviation infrastructure is broad. In partnership with our logistics team, we have practical experience supporting humanitarian efforts to service some of the most difficult-to-reach places on the planet.

We understand the complexity of delivering projects with a high impact on operations and the challenges of working airside.

Healthcare

COVID-19 has brought a sharp focus to the state of the sovereign nations' healthcare systems around the globe. Our team brings over 20 years of experience building tertiary hospitals, community health clinics, rapid deployment medic units, prefabricated/modular facilities, and pandemic response facilities. Large or small, we can assist with health service and facility planning, total project management, and workforce planning from inception through to equipment procurement and commissioning.

Civic & Public

Good governance and law and order are pivotal to the success of a stable community. We have a strong track record in delivering Rule of Law programs that often require the full suite of policing and legal facilities. We have delivered many other civic projects such as convention centres, libraries, city halls, swimming pools, and public domains.

Environment & Communities

We are committed to building and creating environmentally sustainable communities around the world. Whether it be memorials from a troubled past to place making infrastructure we see the importance of linking the built form to the cultural heritage and future aspirations.

OUR SECTORS

Defence & National Security

Our security-cleared team is versed in delivering some of the most important strategic assets for our national governments. Whether new infrastructure to support a new capability or a general base upgrade, we can assemble the right team of experts to bring the most leading edge understanding of this rapidly changing industry. In partnership with our Logistics team, we are also able to support the rapid development of garrison facilities or training exercise structures in some of the most remote parts of the world.

Education

The global education revolution has seen a rapid expansion of high quality, varying modality facilities in both urban and community-based environments. We have worked on facilities including universities, schools, and conference training centres, particularly in very remote Pacific island locations.

Disaster Response

Palladium responds to many of the world's largest disasters and Palladium Infrastructure supports these efforts with rapid deployment of Project Managers and Engineers to bolster our humanitarian efforts.

Road, Rail & Ports

A good transport network is critical for a society to function. Palladium has the expertise and experience to advise and deliver economic and social infrastructure projects and programs that often dramatically improve the communities they serve. Whether a highway, rail line or port facility, we can brief, analyse, design, and deliver outcomes that have a positive impact.

OUR SERVICES

We provide specialty advisory services that set programs or projects up for success, and independent advice on strategic assignments.

Advisory:

- Economic Benefits Analysis
- Financial Feasibility and Business Case Development
- Services and Facility Planning
- Program Management Office Setup
- Social Safeguarding, Gender & Inclusion Planning
- Transaction and Procurement Management
- Coaching, Training, and Development

Delivery:

- Project Direction
- Program Office Management
- Project Control Systems
- Project Management
- Construction Management
- Construction Training and Supervision

Every project presents challenges, whether logistical, budgetary, social, or otherwise. At Palladium Infrastructure, we anticipate these challenges and meet them head on. We take a fresh, pragmatic approach to programs, and provide infrastructure advice and delivery services.

Our comprehensive suite of advisory and delivery services means clients can rest assured that they are in safe hands throughout any stage of the project lifecycle. We analyse every project and deliver bespoke services tailored to the specific challenge or assignment.

Drawing on our global reach and local resource talent pool, we manage our programs and projects with confidence within agreed timeframes, cost constraints, and social parameters.

We do all of this within the traditional development industry parameters of doing no harm and improving the social mobility of every community in which we work.
